Kolberg-Pioneer, Inc.

Kolberg Pioneer has been a leading employer in Yankton since 1965. KPI's mission is to grow and prosper in the industries that it serves, but also is interested in helping the community grow and prosper to create a better place to live and work. The business and its employees have been committed to helping the Yankton community by giving of both time and resources. This extends to several organizations in the area with Habitat being one of them. One of the ways this is done specifically is through KPI's employee match program through which several employees have contributed time and materials to help on the Habitat build sites.

When asked about the Kolberg's partnership with Habitat for Humanity, company President Jeff May states that affordable housing continues to be a huge need in Yankton. He says that Habitat's "hand up, not a hand out" is one of the things that makes Habitat unique amongst charitable organizations and that Kolberg would like to see Habitat continue to grow and offer more housing opportunities for those in need.

KOLBERG PIONEER LOVES HABITAT FOR HUMANITY!

Habitat for Humanity gives me an enjoyable opportunity to help families in the community reach their goal of owning a home. The satisfaction of knowing that I contributed to the family reaching their goal is self-rewarding and puts a smile not only on my face, but also on the team of Kolberg Pioneer and Habitat for Humanity. It's a wonderful experience and I can't wait for the next Habitat for Humanity Build Day!!

Denise Brown (Accounting)

I want my children to learn and understand when a community works together they help out so many people. I want them to learn to help contribute to the community and how rewarding it is.

Chelsi Hames (Purchasing)

I think giving back to the community is important because of all that I have been blessed with. I think working with your co-workers outside the office is a great team building experience and a way to get to know each other on another level.

Beth Breen (Sales/Marketing)

"I feel a sense of satisfaction helping young families that are working to get established. Volunteering time to Habitat for Humanity provides that satisfaction, but I also enjoy the comradery working with others which makes it fun and meaningful."

Randy Heying (Manufacturing Engineering)
